PROFILE

I am a tech student focusing on Computer Science, Data Science, and Artificial Intelligence. I love diving into complex problems, exploring cutting-edge tech, and participating in fast-paced hackathons. Always eager to learn, build, and connect with fellow developers and tech enthusiasts who are shaping the future of technology.

For securing 2nd place in the Ideasprint event conducted as a prt of Samvarthan 2k26 held during 17-18 April 2026.

PROJECTS

02/2026

Forivo

Persona driven Performance Conditioning

Co-founded and led the technical development of **Forivo**, an advanced AI-powered career accelerator that helps job seekers and students master high-stakes interviews. The platform uses specialized AI models to simulate realistic interviewers that mimic human facial expressions, analyze voice pitch and nervous tremors in real time, and generate instant crisis-management scenarios tailored to each user's background.
